THE IVD MARKET

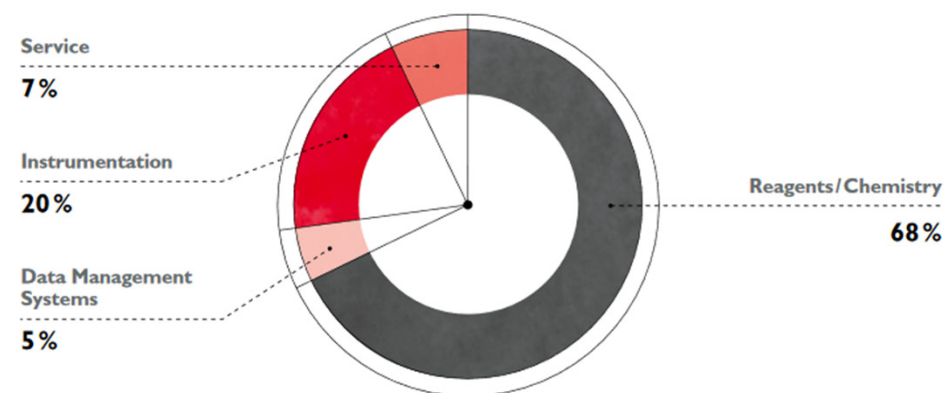

THE IVD MARKET

IVD MARKET SEGMENTS / IVD MARKET: ~ 85 BILLION USD IN 2020

IVD market by technologies

IVD market by product category

Total instrumentation market ~ 17 billion USD

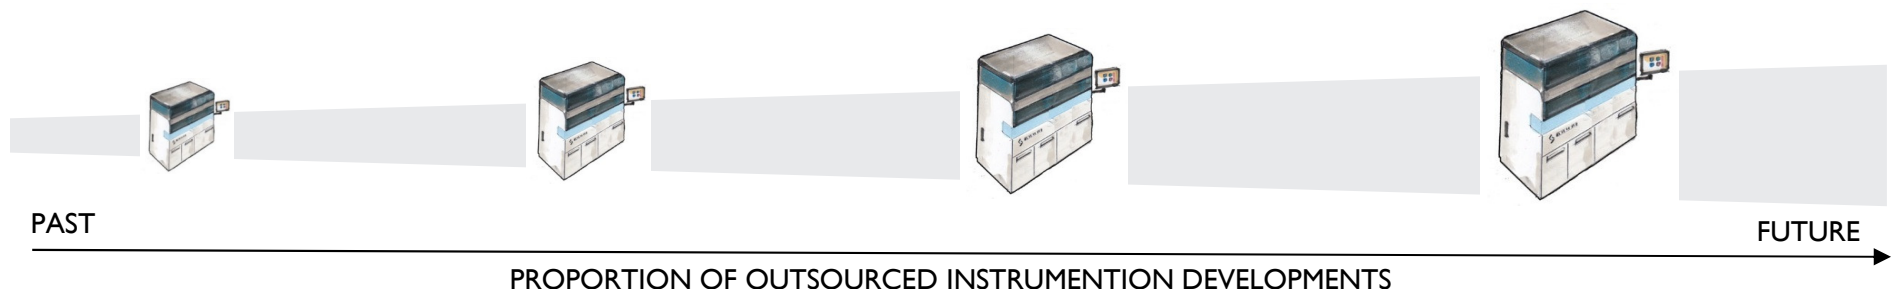

Growth drivers

- Aging world population
- Rising prevalence of chronic diseases
- Expansion in healthcare systems, especially in emerging markets
- New technologies broadening scope of IVD applications (e.g. oncology, personalized medicine or non-invasive prenatal testing)
- Increasing automation

THE IVD MARKET

OUTSOURCED VS IN HOUSE INSTRUMENTATION MARKET

- The majority of instrumentation equipment in the IVD market is still developed in-house by diagnostics companies
- Share of outsourced developments has already increased significantly over the last couple of years
- Trend of outsourcing towards specialized players set to continue, due to:
 - Engineering of automation solutions often not core competence of diagnostics companies
 - Shorter development timeframes due to already existent technology pools
 - Guaranteed project budget and firm transfer prices
 - Keeping up with regulatory developments easier for specialized players
 - Structured processes in order to address end customer needs, such as ease of use, user experience, workflow efficiencies, remote access, serviceability and preventive maintenance
