## BENEFITTING FROM OUTSOURCING TREND

# OUTSOURCED VS IN HOUSE INSTRUMENTATION MARKET

The majority of instrumentation equipment in the IVD market is still developed in-house by diagnostics companies.

Share of outsourced developments has already increased significantly over the last couple of years.

Trend of outsourcing towards specialized players set to continue, due to:

- Engineering of automation solutions often not core competence of diagnostics companies
- Shorter development timeframes due to already existent technology pools
- Guaranteed project budget and firm transfer prices
- Keeping up with regulatory developments easier for specialized players
- Structured processes in order to address end customer needs, such as ease of use, user experience, workflow efficiencies, remote access, serviceability and preventive maintenance

## Proportion of outsourced instrumentation developments over time

Past

Ongoing paradigm shift even within the „blue chips“ towards outsourcing

# STRONG RECURRING REVENUE BASE

## Service parts and consumables (37% of sales)

- Maintenance parts
- Spare parts
- Classic plastic consumables (eg. Pipetting tips, reaction vessels)
- Smart consumables (highly complex cartridges; microfluidics, molding, mastering and coating technologies)

## Fueled by growing installed base and increasing complexity

- Continuously growing number of active systems in the lab
- Strong upward trend in the average complexity of systems
