BENEFITTING FROM OUTSOURCING TREND

OUTSOURCED VS IN HOUSE INSTRUMENTATION MARKET

The majority of instrumentation equipment in the IVD market is still developed in-house by diagnostics companies.

Share of outsourced developments has already increased significantly over the last couple of years.

Trend of outsourcing towards specialized players set to continue, due to:

- Engineering of automation solutions often not core competence of diagnostics companies
- Shorter development timeframes due to already existent technology pools
- Guaranteed project budget and firm transfer prices
- Keeping up with regulatory developments easier for specialized players
- Structured processes in order to address end customer needs, such as ease of use, user experience, workflow efficiencies, remote access, serviceability and preventive maintenance

Proportion of outsourced instrumentation developments over time

Past

Ongoing paradigm shift even within the „blue chips“ towards outsourcing
